OBJECTIVE

I am seeking a software developer internship position where I can expand my programming skill set and positively impact the customer experience.

EDUCATION

Middlesex County College, NJ   Sept 2017 – May 2018
AS Computer Science Major   GPA 3.72/4
Pursuing BS in Rutgers Computer Science Major

PROJECTS

SATCADEMY (http://satcademy.herokuapp.com)   **May 2018**

- A website built using HTML, CSS(Bootstrap framework), and Javascript for front-end, and run by NodeJS for backend.
- It interacts with NoSQL, mongodb to store students' profiles and their SAT histories.
- It scores SAT tests and outputs the grade in a printable format, sends email to student and parent and displays student progress.

TYPO-GENERATOR (http://typogenerator.herokuapp.com/)   **August 2018**

- A website built using ReactJS for front-end and css framework, Semantic UI.
- Increases traffic hits for a user's website and generates more publicity for them.
- Provide potential typographical errors (and check the relevance of that typo would generate in terms of more hits)

TECHNICAL SKILLS

Web Development :	HTML, CSS, Javascript and NodeJS
Database :	NoSQL (MongoDB)
Programming Technologies :	Java, Javascript, and Python

EXPERIENCE

English Teacher at Avalon, Korea   5/2016 ~ 8/2016

- Taught English to Korean elementary and middle school students to raise their proficiency.
- Found new ways to get them engage in classroom activities by studying their behavior.

Sergeant in Republic Of Korea Army   8/2014 ~ 5/2016

- Served Korea military as an artilleryman and earned an award from a regiment competition.
- Learned leadership and responsibility in a team environment.
- Learned to distinguish when to disagree and when to commit to orders.
